

VenTrainer App

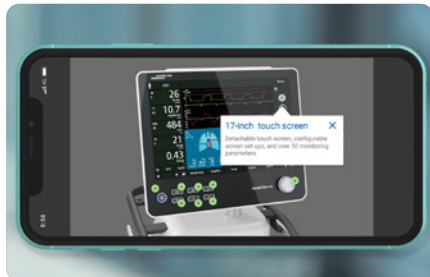

Your virtual ventilation training

Advance your ventilation knowledge with VenTrainer, the free virtual training app for clinicians. Dive into an immersive, and easy-to-setup learning experience and:

- ✓ Explore the ventilators and their features from all angles
- ✓ Discover the fully simulated user interface
- ✓ Learn real world skills through virtual patient models
- ✓ Enjoy a modern and interactive way to learn

Explore, experiment, learn

Virtual showroom

An interactive 3D animation allows you to explore all our ventilator models from all sides and learn about their functions and features through detailed tooltips.

Fully simulated user interface

Explore all the functions and familiarize yourself with operating your ventilator. Learn how to change the graphics, where to set the alarm limits, and how to adjust the parameters.

Physiologic patient model

Monitor how your ventilation strategy affects the patient outcome, in real time, thanks to the physiologic patient model. This enables you to develop your skills and knowledge in a safe and controlled environment.
